

# Single Connection Coupler Now Available\*

- **Hot Swappable-** Allows connecting and disconnecting of tools while the line is under flow (in most cases it's not necessary to place the directional control of the power unit in the neutral position)
- Convert standard AMKUS twin line hoses into a single connection
- Retrofit existing AMKUS rescue tools

*\*Some limitations and restrictions apply: Couplings should be stored in a temperature controlled environment. Low temperature levels and other conditions can cause difficulty in connecting and disconnecting couplers. For safety reasons, there can be no mixing of standard couplers with Mono Couplers. You cannot use standard couplings on one hose end and Mono Couplers on the other hose end.*

**Contact your local dealer to schedule your demo or conversion.**
